User-centered Product Designer with 5+ years of experience building consumer-facing mobile apps (iOS, Android, mobile web). Specialized in creating clear, trustworthy, and emotionally intuitive experiences through strong UX thinking, usability testing, and accessibility. Proven ability to collaborate closely with Product, Engineering, Research, and Brand teams and to drive impact through design systems, early validation, and iterative design.

PROFESSIONAL EXPERIENCE

Innovation Insight

Senior UI/UX Designer

Remote

June 2024 – Present

- Reduced customer support tickets by 30% by redesigning onboarding flows and key user journeys with clearer guidance and improved usability.
- Ensured high-quality product delivery by leading end-to-end design, from discovery and wireframes to prototypes and high-fidelity UI in Figma.
- Improved collaboration and design maturity by mentoring junior and mid-level designers and establishing a strong feedback culture.
- Increased product quality by working closely with Product, Engineering, and Research teams to validate ideas early and iterate continuously in agile sprints.

SwipBox

User Interaction Designer

Sønderborg, Denmark

January 2022 – March 2024

- Built the SwipBox Design System from scratch, boosting efficiency by 60% and standardizing multi-platform apps (web, iOS, Android, wearables, pinpad).
- Increased user trust and task success by simplifying complex IoT and logistics workflows into intuitive, step-by-step user flows.
- Enhanced inclusivity and accessibility by applying WCAG standards, Material Design, and Apple HIG, supporting 15+ user groups including older and non-technical users.
- Improved product adoption by conducting usability testing, persona development, and behavioral analysis to inform design decisions.
- Strengthened stakeholder alignment by collaborating closely with Product Owners, Engineers, and external partners (DHL, GLS, PostNord).
- Produced UX documentation and client-facing design presentations for clear alignment with stakeholders.

Metis International

UI/UX Designer and Frontend Developer

Islamabad, Pakistan

June 2020 – January 2022

- Improved usability of Vodafone Qatar consumer mobile applications by designing mobile-first user flows for customers, drivers, and admin users.
- Reduced usability risks by conducting user interviews, journey mapping, and usability testing to validate solutions early.
- Delivered clear and scalable interfaces by translating complex business and technical requirements into intuitive UX/UI.

- Improved design-to-development handoff by collaborating closely with engineers and supporting implementation with HTML/CSS.

Doerzsoft Automation

Junior UI/UX Designer

Islamabad, Pakistan

February 2019 – June 2020

- Reduced post-release issues by establishing usability testing pipelines and validating designs with users before launch.
- Improved user experience quality by designing interaction concepts and prototypes for B2C telehealth and automation platforms.

EDUCATION

Technische Hochschule Ingolstadt

M. Sc. User Experience Design – Ingolstadt, Germany
2024 – Cont. (Finishing Thesis)

Riphah International University

BS Software Engineering – Islamabad, Pakistan
2015 – 2019
